

Group 2: Public Dashboard Feedback

1. Combine the link containers into one big link container, makes room for other things and just looks better organized
2. Explore dynamic links, so if somebody zooms in on their state, make the links unique to their state...BIG STRETCH GOAL
3. Keep what is on the x and y axis of the graphs clear. Reconfirm this before forming the graphs
4. Possibly switch the bar charts to pie charts to show relative proportions (group decided this didn't make a lot of sense for our case)
